

Challenge 1 - Assessment and migration with SQL Server Management Studio

[Home](#) - [Next Challenge Solution](#)

Goal

The goal of this exercise is to migrate an on-premises SQL Server 2016 database to Azure SQL Database Managed Instance (SQL MI).

Actions

- Perform assessments to reveal any feature parity and compatibility issues
- Analyze workload to identify the appropriate SKU size
- Use Github Copilot to get detailed instructions to remove migration blockers
- Migrate the on-premises databases into Azure, using SSMS

Success criteria

- You successfully assessed the databases against the SQL PaaS target architectures
- You successfully captured the workload and received SKU sizing guidance
- You successfully used Github Copilot to identify and remove migration blockers
- You have successfully migrated the on-premises databases to Azure SQL MI
- You have successfully logged in via SSMS to Azure SQL MI
