

Jurisdiction Risk Matrix and Cross-Border Corridor Rules

Country ratings, corridor combinations and the controls triggered by origin and destination pairs

Document ID	OPS-GEO-005
Document type	Risk methodology
Jurisdiction code	GLOBAL
Applies to corridors	Defines all corridor rules
Issuing body (simulated)	Northwind Commercial Bank - Financial Crime Compliance (fictional)
Version / effective date	v9.0 - reviewed quarterly, current cycle Q1 2026
Modelled on public sources	Composite of public mutual evaluation outcomes, corruption and secrecy indices; ratings below are illustrative
Classification	SYNTHETIC - HACKATHON TRAINING DATA

This document is synthetic content authored for a multi-agent fraud intelligence hackathon. It paraphrases the structure and themes of public materials (Composite of public mutual evaluation outcomes, corruption and secrecy indices; ratings below are illustrative) but contains no verbatim reproduction of them. Thresholds, codes and identifiers are illustrative.

1. How the matrix is used by automated agents

A transaction carries an origin jurisdiction (the country of the ordering institution or the payer's residence) and a destination jurisdiction (the country of the beneficiary institution or the payee's residence). The corridor rating is the maximum of the two country ratings, escalated by one level where any of the corridor modifiers in section 3 apply.

Agents evaluating a case shall retrieve, in order: the corridor rating, the local regulation document for the origin jurisdiction, the local regulation document for the destination jurisdiction, and the applicable typology set.

2. Illustrative country ratings

Country	ISO	Rating (1 low - 4 high)	Principal driver
Spain	ES	1	Effective supervision, EU framework
Germany	DE	1	Effective supervision; elevated cash usage
France	FR	1	Effective supervision
Netherlands	NL	1	Effective supervision; trade and transit hub
United Kingdom	GB	2	Company formation volume, professional enablers
United States	US	2	Large corridor volume, state-level entity opacity

Country	ISO	Rating (1 low - 4 high)	Principal driver
Singapore	SG	2	Wealth management concentration
United Arab Emirates	AE	3	Trade-based laundering and free zone exposure
Mexico	MX	3	Cash proceeds and border corridor intensity
Panama	PA	3	Offshore incorporation and secrecy exposure
Turkiye	TR	3	Sanctions circumvention and gold trade exposure
Nigeria	NG	3	Fraud proceeds and informal value transfer
Cyprus	CY	3	Nominee structures and non-resident deposits
Belgium	BE	2	Effective supervision; diamond trading centre, major port and transit exposure, EU institutional hub
China	CN	3	Underground banking and foreign exchange quota circumvention, trade-based laundering, large manufacturing export flows
Israel	IL	2	Effective supervision; diamond and technology sector exposure, regional conflict financing risk
Bangladesh	BD	3	Trade-based laundering in ready-made garments, informal value transfer, high inbound remittance volume
Country A (fictional)	XA	4	Strategic deficiencies, call for action
Country B (fictional)	XB	4	Comprehensive sanctions programme

3. Corridor modifiers

- Either leg is a free trade zone, offshore centre or special economic zone: +1 level.
- Payment references trade in high-value goods (gold, gemstones, luxury vehicles, electronics, used machinery): +1 level.

- Corridor is not part of the customer's declared trading geography: +1 level.
- Payment is routed through a fourth country with no commercial connection to either leg: +1 level.
- Both legs are rated 1 and the customer has more than 24 months of consistent history: -1 level, floor at LOW.

4. Controls by corridor rating

Corridor rating	Monitoring	Documentation	Approval
LOW	Standard scenarios	None additional	None
MEDIUM	Standard plus corridor scenario set	Purpose of payment captured	Team leader above 50,000 EUR
HIGH	Real-time hold and review	Contract or invoice, source of funds	Compliance officer, any amount above 15,000 EUR
PROHIBITED	Block	Full evidence pack	Financial crime committee, report filed

5. Worked corridor examples for agent testing

Origin	Destination	Resulting rating	Expected agent behaviour
ES	DE	LOW	Pass; log only
ES	AE	HIGH	Retrieve ES and AE local rules; require invoice; check trade-based indicators
MX	US	MEDIUM to HIGH	Check structuring below the US 10,000 USD reporting threshold and cash origin
GB	PA	HIGH	Check layering through offshore entity; verify UBO of the beneficiary company
NG	GB	HIGH	Check fraud proceeds typology and mule account indicators
IL	BD	HIGH	Retrieve IL-REG-016 and BD-REG-017; check garment trade invoicing and diamond or gemstone settlement
AE	BD	HIGH	Check remittance corridor: informal value transfer substitution and wage-earner beneficiary concentration

Origin	Destination	Resulting rating	Expected agent behaviour
BD	SG	HIGH	Check export proceeds retention abroad and under-invoicing of ready-made garment shipments
IL	ES	MEDIUM	Standard corridor; verify diamond or technology trade rationale where high-value goods referenced
BE	IL	MEDIUM to HIGH	Diamond corridor: retrieve BE-REG-018 and IL-REG-016; apply the high-value stone settlement typology and check dealer registration on both legs
CN	BE	HIGH	Retrieve CN-REG-019 and BE-REG-018; check port and transit trade documentation and consignment routing through the fourth country
CN	AE	HIGH	Check foreign exchange quota circumvention, underground banking substitution and free zone re-invoicing
ES	CN	MEDIUM to HIGH	Verify import documentation, customs declaration and consistency with the customer's licensed activity
BE	ES	LOW	Intra-EU; log only unless a corridor modifier applies
Any	XA / XB	PROHIBITED	Block, freeze, escalate within 4 hours
